

20-23 October  
in Gothenburg

## Visit us at SCANPACK

SCANPACK is known as the largest exhibition for the packaging industry in Northern Europe! Follow the whole packaging value chain and get an overview of future trends.

Thurne Teknik will show an extract of its product scope, especially dedicated to processes within Bulk Material Handling, i.e.:

- size reduction
- screening
- mixing
- conveying
- dosing
- compacting

### Bulk Material Processing

- |                         |                                 |
|-------------------------|---------------------------------|
| Vibro Energy Sieves,    | Inline Milling & Sieving        |
| Jet Mills, Hammer Mills | Dehumidifying & Hot Air Dryers  |
| Pneumatic Batch Mixers  | Fluid Bed Dryers, Bell Dryers   |
| Roller Compactors       | Gravimetric Continuous Blenders |
| Big Bag Stations        | Small Sack Stations             |
| Volumetric Feeders      | Gravimetric Feeders             |
| Belt Feeders            |                                 |

Gravimetric Feeder

### Components

- |                      |                                  |
|----------------------|----------------------------------|
| Rupture Discs        | Bursting Disc Indicators         |
| Pipings              | Bellows                          |
| Compensators         | Static Mixers                    |
| Bottom Outlet Valves | Cartridge Filters                |
| Sheet Filters        | Droplet & Coalescence Separators |
| Random Packings      |                                  |

Conical mill Comil U5
